

MICROSCOPE

ABSTRACT OF THE DISCLOSURE

The invention relates to a microscope (2) consisting of a first housing shell and a
5 second housing shell (16 and 18). The first and second housing shells (16 and 18)
define a base part (20) on which the stand (4) rests. The stand (4) is C-shaped, and a
stand base cover (22) closes the stand (4) toward the outside. At least one connecting
means (34) is provided for the first and second housing shell (16 and 18). The
connecting means (34) is not accessible from outside the stand (4) when the stand base
10 cover (22) is in place.
